## EXPERIENCE

### University of Ottawa, Ottawa, ON — *Teaching Assistant*

SEPTEMBER 2016 - PRESENT

- Held a Lab section to teach C++
- Held an office hour to answer students' questions
- Marked the student assignments
- Marked the student midterm exam
- Proctored midterm and final exam

### Talk With Sam! Ltd, Chapel Hill, NC — *Technical Co Founder*

APRIL 2015 - PRESENT

- Designed and implemented a RESTful API server using Ruby On Rails
- Managed the project and distributed development jobs using Trello
- Used Github for version control and deployed the server using Heroku
- Cooperated with the front end developers and finished the IOS App

### University of Ottawa, Ottawa, ON — *Research Assistant*

JULY 2014 - PRESENT

- Implemented a bidirectional LSTM neural network using TensorFlow
- Integrated a background subtraction algorithm to a project using OpenCV
- Contributed to an annotation public project on Github
- Combined OpenTLD tracker with a people detection algorithm for pedestrian tracking

## EDUCATION

### University of Ottawa, Ottawa, ON — *Master of Computer Science*

Sep 2015 - Sep 2017

- Specified in action detection using neural network (RNN)
- Supervised by Robert Laganière focusing on computer vision

### Carleton University, Ottawa, ON — *Bachelor of Computer Science*

2012 - 2015

- GPA 10.28/12 (Letter grade equivalent to A-)
- Math minor GPA 11.20/12 (Letter grade equivalent to A)

## SKILLS

## LANGUAGES

### Proficient in

### Familiar with

## **Chongqing University, Ottawa, ON — Bachelor of Software Engineering**

2010 - 2012

- Grade 84/100 (Letter grade equivalent to A-)
- First year and second year

### **PROJECTS**

#### **Wordpress websites**

- Built three websites using wordpress
- Personal blog ([www.gdf.name](http://www.gdf.name))
- Early childhood institutions ([www.mamituojiao.com](http://www.mamituojiao.com))
- SPA in Ottawa ([www.sis2spa.com](http://www.sis2spa.com))

**TAGS:** wordpress, PHP

#### **API server for an IOS app**

- Implemented the server using Ruby on Rails
- Used Github for version control
- Used Trello for project management
- Deployed the project using Heroku

**TAGS:** Heroku, Github, Trello, Ruby, Rails

#### **King and Things (Board Game)**

- Implemented a desktop game using Qt Creator and C++
- Designed different functions for over 100 characters
- Assigned different characteristics for different maps in the game

**TAGS:** C++, QT

#### **Computer vision annotation**

- Contributed to the public annotation program on Github
- Refactored the tracker function code in the project
- Imported/exported the annotation file by XML
- Added the action type to the annotation frame

**TAGS:** OpenCV, C++
